## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 7-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 15 August 2005.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "an area of at least one of the reticles used to manufacture it" in the last two lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, for being dependent upon a claim with the above addressed 35 U.S.C. 112 problems (i.e. claim 1).

Art Unit: 2853

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim. Claim 1 contains the phrase "an area of at least one of the reticles used to manufacture it". No patentable weight is given to methods of making in claims drawn to structure. In light of this, there resides no structure in the claims that determines what is included and not included in the invention. Therefore, one of ordinary skill in the art would not be able to ascertain the metes and bounds of the term "an area of at least one of the reticles used to manufacture it".

For examination purposes, the examiner will treat claim 1 in its broadest, reasonable interpretation. For claim 1, the examiner asserts that the broadest, reasonable interpretation is "An integrated circuit incorporating microelectromechanical systems (MEMS), having an area".

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Jarrold et al. (US 2002/0093548 A1).

Art Unit: 2853

With respect to claim 1, Jarrold discloses an integrated circuit incorporating microelectromechanical systems (MEMS), having an area (paragraphs 001, 004).

With respect to claim 3, Jarrold discloses the surface area of the integrated circuit (Fig. 7).

With respect to claim 6, Jarrold discloses a printhead integrated circuit (Fig.7; paragraphs 001, 004).
